Title

(Do not place identifying information here to ensure a double-blind review)

Abstract

We are shifting to a structured format for abstracts. Below are the required sections of the abstract. Please write in complete sentences and add appropriate information after each heading, while not exceeding 250 words total.

Objectives:

Method:

Results:

Conclusions:

Implication for Theory and / or Practice:

Keywords: Select 3-4 keywords that characterize the main focus areas of the manuscript. These are used by databases for archival and retrieval of the article and are very important.

Title

While authors may choose their own sectioning consistent with American Psychological Association (7th ed.) style, manuscripts should contain **at a minimum**:

Introduction

Literature Review (including discussion of the theoretical/conceptual framework)

Purpose of the Study and Hypotheses

Methods

Procedures (including a statement that the study was approved by the institutional IRB as well as approval number)

Population and Sample

Instrumentation

Analysis

Results

Discussion

Integration into the Literature

Limitations of the Study

Implications for Research and Theory and/or Practice

Conclusions

Acknowledgements (if applicable)
